

The history of the RIDE

The PCC Presidential ride humble beginnings started several years back was the brainchild of one Jeff Yee and Uncle Cheah. The whole idea behind the ride was to have a ride that is the mother of all mountain bike ride designed to torture and push the limits of riders of all capabilities.

The first 3 Presidential rides were around the Shah Alam - Kampung Subang- North Hammock- Meru loop. All 3 rides were about 100km long with the last one stretched to 114km. The route profile were mainly palm and rubber estates with moderate climbs and nothing technical. The first ride attracted a small group but as word got around the subsequent rides had over 100 riders. Ask some of those who did this ride and they can tell you that it would be one of their most memorable ride by far. A truly PCC classic and epic ride.

Unfortunately development devastated most of the trail and we are left with small bits namely the RRI parts. This forced us to look for an alternative site. Thanks to several Kajang riders and the KLMBH who were among the first to ride there, a potential new Presidential trail was borne. They are the ones who rode these trails and showed us the way. It was PCC who put the parts all together. The Semenyih Trails are not as long as the original but it is more varied and challenging. It features bits of every thing mountain biking in Malaysia has to offer. Here you will find estate trails both rubber and palm, canopied single tracks, jungles both virgin and rejuvenated, dirt trails, logging trails, fruit farm.

So for the last 2 years we had great support for the new trail. Over 70 people turned out for both rides. This year we hope these wonderful trails get the recognition it deserve as we will be having Proton Edar sponsoring us.

Be part of a legend, ride the Presidential Ride before it is gone forever.
